DRIVERS - COMPATIBILITY CHART

This compatibility chart describes operating system versions supported by Evolis drivers solutions (desktop and mobile solutions). Other versions are not supported but installation is allowed.
Evolis printer drivers are qualified on currently supported versions of operating systems. Evolis declines any responsibility in the event of malfunction, limitation, or compatibility issues resulting directly from a problem with the operating system or its publisher, independently of Evolis printer drivers.
If an issue originates from the operating system itself, it must be corrected by the system publisher and falls outside Evolis responsibility.

(1) DHCP network configuration not available on Evolis Premium Suite 2 & Edikio Premium Suite 2 for macOS.
(2) ARM64: compatible with Apple Silicon (M1 / M2 / M3 / M4 / M5) architectures for macOS and Apple architectures for iOS.
(3) Evolis Premium Suite 2 available only in minimal mode (without end-user alerts and notifications).
(4) Evolis Linux drivers have been qualified on Ubuntu 20,04 and Kylin OS v10 SP1. Other Linux distributions and architecture are not supported by Evolis but installation is allowed.
(5) Android / iOS compatibility concerns Evolis Print Service app (mobile app available on Google PlayStore and App Store). Contact Evolis or check Evolis website for further details about compatibility with manufacturers models and Android / iOS versions.
☑: Certifications approved: Microsoft hardware certification (Microsoft tests have been validated on this version).
